

Psychotropic Medication Review Interdisciplinary Team (IDT) Meeting Readiness Assessment

<i>Facility Data</i>	Facility Percentage	Pennsylvania Average	National Average
Percentage of long stay residents who got an antipsychotic medication.			
Percentage of long-stay residents who got an antianxiety or hypnotic medication.			

<i>Facility Questionnaire</i>	YES	NO
Would your facility benefit from the addition of an IDT meeting that focuses on reducing the inappropriate use of psychotropic medications?		
Is leadership at the facility willing to support this initiative and devote staffing resources necessary for the implementation of an IDT meeting?		
Is the facility ownership and/or leadership expected to remain stable over the next 6 months?		
Can the staff schedule time to participate and would they be willing to participate in an IDT meeting?		
Has the staff received training in person-centered care and how to respond effectively to behavioral and psychological symptoms of dementia using non-pharmacologic interventions?		
Is the staff ready to act upon recommendations that result from the IDT meeting?
